

Miovision Traffop

We believe in the power of analytics. Unlock the power of your signal Infrastructure.

Start using your data in the fast lane

Leverage your existing infrastructure to turn your transportation data into actionable insights. Our signal performance software identifies and prioritizes signal timing and maintenance issues to allow your team to focus resources in the most impactful way for your community.

Citizen Impacts

Increased Safety

Proactive operations and maintenance practices can improve safety by reducing congestion caused by outdated signal timing and poor performing infrastructure.

Targeted Maintenance

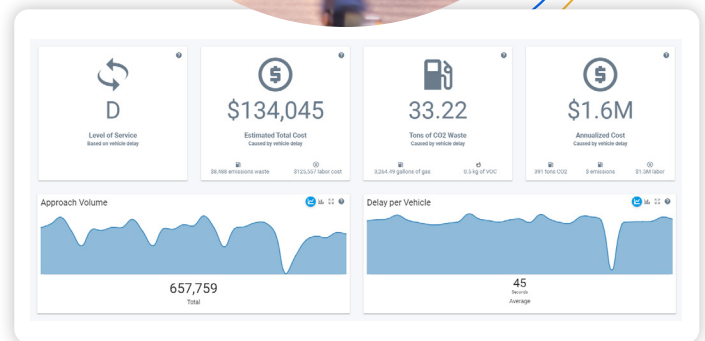

Proactive operations and maintenance practices provide actionable information needed to deliver high-quality service to residents.

Improved Operations

Active monitoring of intersection performance lets agencies address problems before they become complaints.

Reduce GHG Emissions

Ensure optimal signal operations and timing for your network on a continual basis by relying on current data from your network. Improve platooning, decrease travel time, and mitigate idling to achieve GHG emissions targets and fuel cost savings.

MIOVISION

Why Miovision

We deliver a seamless, high-quality digital experience to our customers

New technologies for monitoring arterial performance measures generate a lot of data

Breaking down this critical information can be a complex challenge. By summarizing the data into a concise, easy-to-understand format that shows trends and patterns, we've done the heavy lifting for you. Now you can focus on solving problems. Not sifting through data.

Executive Reports

Measure and share the impact of your teams efforts with high level metrics that align with local policy initiatives and goals. Level of Service, CO2 Emissions, and Cost of Delay are automatically generated within the platform for each intersection. This readily available reporting helps facilitate collaboration and resource allocation amongst agency stakeholders.

Cloud-Based Functionality

Our solution is designed for the cloud, which means no versions, no upgrades, no downloads, and no migrations. It all happens automatically, so there's less risk, less to manage, and less downtime. This all means minimal IT overhead and continuous value from your software investment.

Executive Reports

Streamlined deployment gets you up and running in 30 days or less

We don't sell your data

Easy, open and secure API access to all your data

Unmatched Customer Service
